

KEVIN MOORE
HONEYWELL

Kevin Moore currently serves as Global Engineering Leader in the Commercial Control Systems group a part of the Environmental and Combustion Controls strategic business unit. Moore leads a cross-functional team of more than 75 engineers in four countries in the development of building environmental control systems.

With a Bachelor of Science in Electrical Engineering from the Missouri Institute of Technology and Master of Science in Technology Management from the University of St. Thomas, Moore is a certified Project Management Professional (PMP) and Six Sigma Greenbelt with experience in product and technology development, engineering management, and organizational development. His areas of expertise are in micro-powered integrated circuit design for communication applications and communication protocol development as well as motion control for industrial automation. He has six issued patents, 12 patents pending, and more than 30 invention disclosures encompassing a variety of electronic, mechanical, and software applications.

Moore has worked for other leading companies including Honeywell Commercial Control Systems, Cypress Semiconductor, Emerson Electric, Cornerstone Controls Company, and Lucht Engineering.
