

Tony Ramunno, PE
Great River Energy

Tony Ramunno attended Youngstown State University and the University of St Thomas and holds degrees in Electrical and Manufacturing Systems Engineering respectively. He is a registered Electrical Engineer (PE) in Minnesota and Ohio with over 20 years of electric utility experience in the areas of generation and transmission. As Director, Engineering & Project Management, he presently leads the transmission engineering & project management group and is responsible for cradle to grave oversight of load serving transmission projects for Great River Energy and its 28 member cooperatives.
